

## **PRESS RELEASE (No. 13)**

**19<sup>th</sup> April, 2017**

Baar Switzerland

### **Amicus S.A. announces signature of a Distribution Agreement to represent Cardinal Health's Cordis Portfolio in Western Balkans and Baltic states.**

On February 21st, 2017 Amicus S.A. and Cardinal Health Switzerland 515 GmbH, both of Baar, Switzerland, signed a distribution agreement that includes the products of Cordis, Cardinal Health's interventional vascular business. The agreement provides that Amicus S.A. and its affiliates will represent Cordis' interventional vascular product portfolio in the Baltics states (Estonia, Latvia and Lithuania) and the states of the West Balkans (Bosnia & Herzegovina, Croatia, Serbia and Slovenia) effective as of May 2017. Amicus will provide services including distribution, tender participation, marketing and promotion, market access, and pricing.

"This agreement sets another major milestone for Amicus," commented Amicus co-founder and Head of Corporate Development Stuart Swanson. "Not only does the Cordis portfolio reinforce our presence in the cardiovascular space, but more importantly this contract takes the company decisively into medical devices. We are honored to be chosen by Cardinal Health, and eager to grow this business from the strong base that Cordis has already established in our regions during the past decades."

Amicus CEO Jean-Michel Lespinasse noted that the Cardinal Health distribution agreement includes all of Amicus' current large markets, making the contract a strategic and important relationship for the company. Lespinasse further expressed the hope "that the contract could, should Amicus perform, presage further cooperation with Cardinal Health."
