

PRESS RELEASE

19 July 2016

Baar, Switzerland and Belgrade, Serbia

Amicus S.A. announces signature of a Distributorship Agreement to represent Laboratoires Expanscience in Serbia, Bosnian Federation, Macedonia and Montenegro.

On July 17th, 2016 Amicus A.G. of Baar, Switzerland, and Laboratoires Expanscience of Paris, France signed a contract under which Amicus will represent Expanscience's Mustela line in Serbia, the Federation of Bosnia and Herzegovina, Macedonia and Montenegro effective immediately. The agreement provides for Amicus to commercialize Expanscience's innovative dermo-cosmetic line for babies, children and young mothers in the territory for several years.

"This agreement will allow Amicus to substantially strengthen its position in the pharmacy, in dermatology, in paediatrics and OB/GYN across the four countries," Predrag Lukic, COO, Regional Director Non-EU former Yugoslavia and GM of Amicus SRB doo commented. "We are very proud to be given the opportunity to represent the Mustela line and we thank Laboratoires Expanscience for its expression of confidence in Amicus," said Lukic. "We feel particularly blessed because we are already working in dermatology and in paediatric area for other clients (Pfizer, Sinclair Pharma, UPSA and Lactalis), and adding the exquisite Expanscience portfolio is highly synergistic and should allow us to make strong sales inroads for Mustela."

Under the agreement, Amicus' four affiliates will commercialize, promote and provide services related to the Mustela portfolio, including distribution, regulatory, marketing, pharmacy channel and medical promotion and medical affairs.

About Laboratoires Expanscience

Expanscience is an independent, family-owned French pharmaceutical and dermo-cosmetics laboratory with worldwide sales approaching 300 million Euros. Over more than 60 years, the company has built up a solid international reputation as an innovator and as a specialist in skin and the treatment of arthritis. Its products, which include two leading brands – Piasclédine 300 and Mustela – are sold in more than 97 countries (84 distributing countries and 13 subsidiaries).
